PROFESSIONAL SUMMARY

IT professional with 3.5 years of professional experience at HCLTech, specializing in Project Apria, Accounts Receivable (AR), Denial Management, operational reporting, and technical support. Experienced in analyzing business processes, resolving complex operational issues, and supporting process improvements through analytical thinking and data-driven decision-making. Currently transitioning into software development by building real-world applications, including TradingPilot AI Stock Analysis Extension and Zamss.in, while continuously expanding expertise in Java, Python, JavaScript, React, FastAPI, SQL, and AI-assisted development.

TECHNICAL SKILLS

Languages: Java, Python, SQL
Frameworks & Technologies: React, FastAPI, REST APIs, Chrome Extension API
Databases: MySQL, SQLite
Developer Tools: Git, GitHub, VS Code, ServiceNow, SCCM, TeamViewer, RemoteDesktop.
Data & Analytics: Excel, Power BI, Data Analysis
Professional Skills: Accounts Receivable, Denial Management, Root Cause Analysis, Technical Troubleshooting, Problem Solving
AI Tools: Codex GPT, Claude Opus, Antigravity

PROFESSIONAL EXPERIENCE

Process Associate — Project Apria — *HCLTech* Nov 2023 – Apr 2026

- Analyzed insurance claim denials and payment discrepancies to drive timely account resolution.
- Conducted Accounts Receivable (AR) analysis to prioritize outstanding claims and improve recovery efficiency.
- Reviewed claim histories, remittance advice (ERA/EOB), and payer responses to determine appropriate follow-up actions.
- Prepared daily operational reports and tracked productivity metrics using Microsoft Excel.
- Identified recurring denial trends, recommended process improvements, and maintained SLA and quality standards across high-volume workflows, partnering with cross-functional teams and insurance representatives.

Desktop Support Engineer — *HCLTech* Nov 2022 – Nov 2023

- Diagnosed and resolved hardware, software, Windows OS, printer, and network issues, managing incidents via ServiceNow to consistently meet SLA targets.
- Performed remote troubleshooting using SCCM and TeamViewer, and conducted root cause analysis for recurring issues.

FEATURED PROJECTS

TradingPilot — AI Stock Analysis Extension

Tech Stack: *React, TypeScript, Python, FastAPI, TradingView, Chrome Extension API*

- Built an AI-powered Chrome extension for real-time TradingView analysis using Support & Resistance, EMA, RSI, MACD, and candlestick strategies, with an intelligent Buy/Sell/Hold decision engine and a premium, responsive UI.

Zamss.in — Dropshipping E-commerce Platform

Tech Stack: *React, JavaScript, HTML, CSS, Node.js*

- Developed a responsive e-commerce platform with product catalogue, search, cart, and admin dashboard, with optimized performance and a modern UI/UX.

Sales Data Analysis using Python

Tech Stack: *Python, Pandas, NumPy*

- Performed exploratory data analysis and visualization on sales datasets to surface trends and business insights.

Employee Attrition Prediction

Tech Stack: *Python, Pandas*

- Built a machine learning model with feature engineering and evaluation to predict employee attrition.

Excel Automation Dashboard

Tech Stack: *Microsoft Excel, Power Query*

- Built automated, interactive dashboards for productivity and SLA tracking, reducing manual reporting effort.
