SHAMSUDEEN

Data Analyst
Chennai, Tamil Nadu | +91 96000 39372 | abushamsudeen667@gmail.com | linkedin.com/in/samsuuuuuu

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with 3+ years of experience at HCL Technologies transforming large healthcare datasets into actionable insights. Proficient in **SQL**, **Python (Pandas, NumPy)**, **Advanced Excel** (Macros, Power Query, Pivot Tables), and data visualization with **Power BI**, **Matplotlib**, and **Seaborn**. Proven track record of automating reporting workflows, conducting data audits, and building dashboards that drive operational and business decisions.

TECHNICAL SKILLS

- **Data Analysis & Querying:** SQL (Joins, Aggregations, CTEs, Window Functions), Python (Pandas, NumPy), Advanced Excel (VLOOKUP, INDEX/MATCH, Pivot Tables, Power Query, Macros/VBA)
- **Data Visualization & BI:** Power BI, Tableau (basics), Matplotlib, Seaborn, Excel Dashboards
- **Statistics & Modeling:** Descriptive Statistics, EDA, Hypothesis Testing, Linear & Logistic Regression, Clustering
- **Data Handling:** Data Cleaning, Data Wrangling, ETL Concepts, Data Validation, Reporting Automation
- **Tools:** MS Excel, MySQL, Jupyter Notebook, ServiceNow, Git (basics)
- **Soft Skills:** Analytical Thinking, Attention to Detail, Stakeholder Communication, Problem Solving, Collaboration

PROFESSIONAL EXPERIENCE

Process Associate – Data Operations | HCL Technologies

Dec 2023 – Present · Chennai, Tamil Nadu

- Analyzed large healthcare insurance datasets (10K+ records weekly) to ensure data accuracy and timely financial reconciliation, reducing discrepancies in payment posting.
- Built **automated Excel reports** using Macros (VBA) and Power Query, cutting manual reporting effort by ~60% and improving turnaround time on SLA reports.
- Wrote SQL-style lookups and advanced Excel queries to perform **data audits**, identify anomalies, and validate production data against source systems.
- Designed interactive **dashboards** (Excel / Pivot-based) tracking SLA compliance, production volume, and quality metrics, providing leadership with real-time visibility.
- Partnered with operations leads to identify process gaps from data trends, recommending workflow improvements that increased team productivity.
- Documented data definitions and reporting logic, ensuring consistency across multiple healthcare insurance transition projects.

Desktop Support Engineer | HCL Technologies

Nov 2022 – Nov 2023 · Chennai, Tamil Nadu

- Analyzed and prioritized 50+ daily IT tickets in **ServiceNow**, using trend analysis to identify recurring issues and reduce repeat incidents.
- Performed root cause analysis on incident data, producing weekly reports that informed preventive maintenance actions.
- Maintained accurate asset and ticket data records, supporting clean reporting and audit readiness.

PROJECTS

Sales Data Analysis – Python (Pandas, NumPy, Seaborn)

- Cleaned and analyzed 10,000+ sales records; performed EDA to uncover top-selling regions, seasonality, and customer buying patterns.
- Built visualizations (bar, heatmap, time-series) to communicate insights to non-technical stakeholders.

Employee Attrition Analysis – Python (scikit-learn)

- Performed EDA on HR dataset to identify key attrition drivers (tenure, department, satisfaction).
- Built a **Logistic Regression** model, encoded categorical features, and evaluated using accuracy, precision, and recall.

Excel Automation Dashboard

- Developed a dynamic Excel dashboard tracking attendance, production, and SLA compliance using formulas, conditional formatting, and macros for weekly auto-refresh.

CERTIFICATIONS

- **Data Science Bootcamp** – Udemy (In Progress, 2025): Statistics, Pandas, NumPy, Matplotlib, Seaborn, Machine Learning, Model Evaluation, Business Case Studies.
- **Python Programming** – QSpiders (2025): Core Python, OOP, File & Exception Handling, libraries for data manipulation and automation.

EDUCATION

B.Tech – Information Technology, Mohamed Sathak A.J. College of Engineering · CGPA 7.85/10 · 2018 – 2022
